How to Use This Guide:

Available plants are arranged alphabetically by Botanical Name, with the Common Name shown for reference. The range of Exposure and Irrigation Tolerance for each plant is shown, according to the following key:

Water:

All plants need regular deep watering, at least until they are established. Once a good root system is established, use these guidelines for the above listed plants:

- * Regular garden water: Once every one to two weeks.
- * Occasional water: Once every four to six weeks.
- * Drought tolerant: No supplemental water required, but this plant appreciates a drink once or twice in the summer.

Exposure:

Use the information in this Plant Selection Guide to help you to select plants for the different areas of your garden.

- * Full sun: At least six hours of direct sun per day.
- * Part sun: Bright indirect light, dappled light, or a half day of sun.

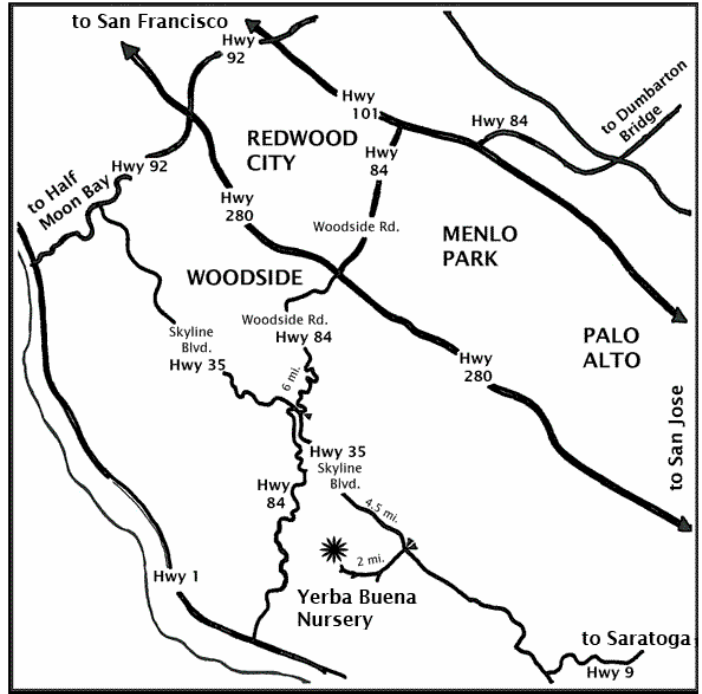

Please check our web site for current prices on each plant and size.

Directions to Our Nursery:

Recommended Route: Hwy 280 → Hwy 84 W → Hwy 35 S

- From **Hwy 280**, exit at Woodside Rd./Hwy 84; head **West on 84** (coming from San Francisco, make a Right on 84; coming from San Jose, make a Left on 84).
- Follow Woodside Road/Hwy 84 through the town of Woodside and up to the top of the ridge where you will hit Skyline Blvd./Hwy 35 (a little over 6 miles).
- Make a Left onto Skyline Blvd./**Hwy 35 South**. After about 4.5 miles you will see signs for Fogarty Winery on the Left, and then a **sign for Yerba Buena Nursery on the Right**.
- Make a Right at the sign and follow the main road (keep to the right) to our gate.

Note: Our dirt road is well-maintained and passable by normal passenger vehicles 12 months of the year.
